

MITIGATION MONITORING PROGRAM
PROJECT NO. R2011-00719 / CUP NO. 201100066 / ENV NO. 201100100

The Department of Regional Planning staff has determined that the following mitigation measures for the project are necessary in order to assure that the proposed project will not cause significant impacts on the environment.

The permittee shall deposit the sum of \$6,000.00 with the Department of Regional Planning within 30 days of permit approval in order to defray the cost of reviewing and verifying the information contained in the reports required by the Mitigation Monitoring Program.

Mitigation	Action Required	When Monitoring to Occur	Responsible Agency or Party	Monitoring Agency or Party
BIOLOGICAL RESOURCES				
<p>1 Project related activities likely to have the potential of disturbing suitable bird nesting habitat shall be prohibited from February 1 through August 31, unless a biological monitor acceptable to the Director of Planning surveys the project area prior to disturbance to confirm that disturbance to habitat will not result in the failure of nests on-site or immediately adjacent to the area of disturbance. Disturbance shall be defined as any activity that physically removes and/or damages vegetation or habitat, any action that may cause disruption of nesting behavior such as noise exceeding 90dB from equipment, or direct artificial night lighting. Surveys shall be conducted on the subject property within 300 feet of disturbance areas (500 feet for raptors) no earlier than seven (7) days prior to the commencement of disturbance. If an active nest is discovered on-site or can be reasonably deduced to exist immediately adjacent off-site (in cases where access to adjacent properties is prevented), the project biologist shall demarcate an area to be avoided by construction activity until the active nest(s) is vacated for the season and there is no evidence of further nesting attempts. This demarcated area will incorporate a buffer area surrounding the active nest that is suitable in size and habitat type to provide a reasonable expectation of breeding success for nesting birds. Limits of avoidance shall be demarcated</p>	Bird nesting surveys	Prior to grading and other site disturbance if conducted from February 1 through August 31	Applicant	Department of Regional Planning

	with flagging or fencing. The project proponent shall record the results of the surveys and recommended protective measures described above and submit the records to the Department of Regional Planning to document compliance with applicable State and Federal laws pertaining to the protection of native birds				
HYDROLOGY/WATER QUALITY					
2	Project construction will implement and maintain Los Angeles County Best Management Practices for storm water and surface runoff.	Implement BMPs for storm water and surface runoff	During construction	Applicant	Department of Public Works
MITIGATION COMPLIANCE					
	As a means of ensuring compliance of above mitigation measures, the applicant and subsequent owner(s) are responsible for submitting compliance report to the Department of Regional Planning for review, and for replenishing the mitigation monitoring account if necessary until such as all mitigation measures have been implemented and completed.	Submittal and approval of compliance report and replenishing mitigation monitoring account	Yearly and as required until all measures are completed.	Applicant and subsequent owner(s)	Department of Regional Planning

As the applicant, I agree to incorporate these mitigation measures into the project, and understand that the public hearing and consideration by the Hearing Officer and/or Regional Planning Commission will be on the project as mitigation measures.
